

# Outlook<sup>®</sup> herbicide

## Establish<sup>™</sup> herbicide

## Propel<sup>™</sup> herbicide

## Supplemental Label

For Distribution and Use Only in the State of South Dakota  
Environmental Precautions and Soil Type Restrictions

EPA Reg. No. 7969-156

EPA SLN: SD-060005

This Special Local Need label also applies to the following Supplemental Distributor products:

Establish<sup>™</sup> herbicide, EPA Reg. No. 7969-156-55467

Propel<sup>™</sup> herbicide, EPA Reg. No. 7969-156-32938

This label expires June 30, 2011.

### Directions for Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Refer to the container label for additional directions, restrictions, precautions and **Conditions of Sale and Warranty** on the EPA-registered label. This labeling must be in the possession of the user at the time of application.

### Environmental Precautions

Where groundwater is near the surface and the soil is coarse and permeable, agricultural chemicals have potential to contaminate the groundwater. The following restrictions have been developed to protect drinking water supplies.

#### Point source contamination:

Do not transfer, clean, wash, load, unload, rinse, refill, mix, or empty containers or equipment containing **Outlook** or any other pesticide product within 150 feet of any well, sink holes, natural or impounded lakes and reservoirs, perennial or intermittent streams and rivers, or wetlands unless it is done so over a South Dakota Department of Agriculture approved operational area containment.

Any spilled material must be immediately recovered. Discharges in excess of 25 pounds active ingredient must be reported to the department. Recovered material must be properly stored and handled until proper disposal or use has occurred. The owner or operator shall provide written documentation to the department describing the cause of the discharge, recovery, and sampling procedures analysis reports, and disposition of the recovered materials within 30 days following the date the discharge occurred.

#### Movement dissolved in runoff or through soil:

Do not apply under conditions which favor runoff. Do not apply to impervious substrates such as paved or highly compacted surfaces or frozen soils. Runoff is minimized through practices that also reduce soil erosion. Slope, grass buffer/filter strips, soil types, tillage practices and drainage conditions must be all considered to prevent contamination of surface water through runoff and erosion.

Groundwater contamination may occur in areas where soils are permeable or coarse and groundwater is near the surface. To minimize the possibility of groundwater contamination, carefully follow application rate recommendations as affected by soil type in the general information section of this label.

### Soil Type Restrictions

**In South Dakota, Outlook is not permitted to be applied on soils listed below where groundwater is within 30 feet from the surface.**

In the following South Dakota soils series have sand or fine sand texture described in a horizon depth of 0-12 inches and have an organic matter content of 3% or less (based on the NRCS Soils 5 Database). If the water table is less than 30 feet below land surface, do not apply to the following vulnerable sandy soils. If the water table is unknown, do not apply **Outlook** to a restricted soil.

#### Soil Series Restricted:

- |           |              |             |
|-----------|--------------|-------------|
| • Bankard | • Inavale    | • Seroco    |
| • Banks   | • Ipage      | • Thurman   |
| • Boel    | • Lihen      | • Trey      |
| • Doger   | • Maddock    | • Valent    |
| • Dwyer   | • Minnewasta | • Valentine |
| • Els     | • Sarpy      | • Wortman   |
| • Hopdraw | • Serden     | • Zeona     |

If a field contains several soil types, one of which is a vulnerable soil listed above, and the water table is less than 30 feet, do not apply **Outlook**.

#### Conditions of Sale and Warranty

The **Directions For Use** of this product reflects the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. All such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the **Directions For Use**, subject to the inherent risks, referred to above.

BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. TO THE EXTENT PERMITTED BY LAW, BASF OR THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing **Conditions of Sale and Warranty** which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
